## KEY FEATURES

## COLOCATION SERVICES

### Secure hosting from Node4

#### Your equipment in state-of-the-art Node4 Data Centres.

Node4 Colocation services offer a secure and resilient hosting environment for you to operate your existing IT investments. Our Data Centres are purposely designed, built and managed by us to ensure that the required security, connectivity, and environmental aspects are all in place to give our customers peace of mind in knowing that their equipment is in safe hands.

With a national Data Centre presence, we have sites in Derby, Leeds and Northampton totalling 84,000 sq. ft. and housing over 1,500 racks. All of our sites offer high specification and resiliency in cooling, power and connectivity. Furthermore, our sites are robustly connected and sited within our national MPLS network.

Colocation from Node4 ensures your vital IT infrastructure is always online, safe and secure. By collocating your equipment with us, you can avoid the high costs of running and maintaining your own server environment, whilst saving space in your office.

#### KEY BENEFITS

- ✓ **SECURITY**  
Our ISO27001 certified Data Centres have been designed and built with high level security in mind. All our facilities are kept under 24-hour CCTV surveillance with manned onsite security in place at all times. Fully customised caged areas are available.
- ✓ **COST SAVING**  
The cost of building and maintaining the Data Centre has been handles by us, allowing you to spend time and money on other, more important business activities.
- ✓ **FLEXIBILITY**  
We have full control over the infrastructure of our Data Centres and the connectivity going into them, meaning that we have the ability to be as flexible as possible with our service offerings.
- ✓ **SUPPORT**  
Our highly skilled support team is available around the clock so there is always someone available should you need them. Providing that an appointment is made in advance, your equipment is accessible at any time of the day.

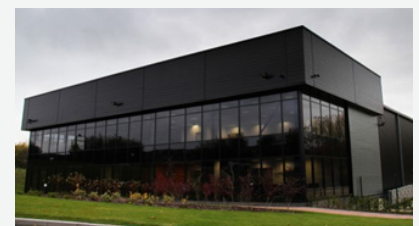

#### Derby

330 Racks  
4 Data Halls  
2.5MVA Power  
N+1 Generator Backup  
N+1 UPS  
Full Concurrent Maintainability

#### Leeds

450 Racks  
4 Data Halls  
3.3MVA Power  
N+1 Generator Backup  
N+N UPS  
Full Concurrent Maintainability

#### Northampton

800 Racks  
3 Data Halls  
4.0MVA Power  
N+1 Generator Backup  
N+N UPS  
Full Concurrent Maintainability

## KEY FEATURES

### Security

---

#### ISO 27001 Information Security

Our ISO 27001 Security Certification ensures we meet stringent control requirements to manage information securely.

#### 24/7 Security

With manned security staff on-site at all times, and fully-monitored CCTV covering all entry and exit points to our buildings, we ensure that your solution is always protected.

#### Perimeter Fencing with Strict Access Policies

All of our Data Centres are surrounded by perimeter fencing and we operate a strict Photo ID swipe card entry system for access to the building.

---

### Connectivity

---

#### Dedicated Internet

We are carrier neutral and have the ability to offer dedicated internet connections along with site-to-site connectivity to link up multiple business sites to our Data Centres.

#### Core MPLS Network

All of our Data Centres are connected to our very own robust, superfast MPLS network with resilient connections to Telehouse, Global Switch and Teleticity.

---

### Node4 Expertise

---

#### Data Centre Knowledge

We have been providing Data Centre services since our founding year of 2004.

#### Skilled Engineers

Our highly skilled on-site support and 'remote hands' services for colocation make it possible to perform physical tasks immediately on your hardware without leaving your desk.

### Cost Effective

---

#### Sweat Your Existing Investment

House your existing investments within the secure, managed environment of one of our Data Centres.

#### Scalability

Easily scale your rack spaced up or down depending on your businesses requirement.

---

### Environment

---

#### Disaster Prevention

Through the use of VESDA fire detection, and intelligent fire suppression Systems in each Data Hall, we can ensure that your equipment is always guarded against any potential disasters.

#### Temperature Controlled

Our Data Halls are fitted with state-of-the-art cooling technology to ensure that the environment is perfect for your equipment to function.

---

### Location

---

#### UK Based

Our data centres are based along the spine of the UK, with each facility offering multiple easy access routes to major travel networks.

#### Free Parking

Free parking and a selection of electric vehicle charging points are available for all customers.

---

### Power

---

#### Up to 32 Amps per Rack

We offer flexible power options with up to 32 amps available per rack, and optional dual power feeds with 100% SLAs.

#### Resilient Backup Power

UPS and backup generators are in place to ensure that our Data Centres carry on running in the event of power failure.
